Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitation "the low frequency component " in line 9. There is insufficient antecedent basis for this limitation in the claim.

In addition, the phrase "an extraction device that extracts the low frequency component below the audible frequency" is vague because it does not link any particular signal source as the focus of the signal processing. For example the low frequency component extracted could emanate from the claimed the reproduced signal or some other source. In light of the specification, it appears that Applicant is attempting to claim the feature of a low pass filter which is used to extract the low frequency component below the audible frequency of noise picked up by a microphone. Applicant is encouraged to use the above language when amending the claim.

Claims 13 and 18 recite the limitation "said open/closed status". There is insufficient antecedent basis for this limitation in the claim as that feature was eliminated from the independent claim 12.

Claims 15 and 16 are indefinite because they refer to sound correction using the phrases "the amount that the sound of frequencies below a specified frequency is corrected" and "the

amount that the sound in the full range of the signal being reproduced is corrected", respectively, which are confusing.

Claim 20 recites the limitation "the low frequency component " in lines 5-6. There is insufficient antecedent basis for this limitation in the claim.

In addition, the phrase "an extraction process of extracting the low frequency component below the audible frequency" is vague because it does not link any particular signal source as the focus of the extraction process. For example the low frequency component extracted could emanate from the claimed the reproduced signal or some other source. In light of the specification, it appears that Applicant is attempting to claim the method step of extracting the low frequency component of noise picked up by microphone below the audible frequency. Applicant is encouraged to use the above language when amending the claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (571) 272-7527. The examiner can normally be reached on M-F 7-4:30.
